PORTFOLIO

<https://odinsontm.github.io/>

SKILLS

Languages: JavaScript, Python, HTML, SQL | Frameworks/Libraries: React, Node.js | Tools & APIs: GitHub, Discord API, REST APIs, CSS, Agile Methodology

EXPERIENCE

Farstar Agents, Remote - *Development Contractor* 06/2025 - 01/2026

- Partnered closely with designers to translate wireframes and UX requirements into responsive React interfaces across 5 core application screens, ensuring consistency across desktop and in-game overlay experiences.
- Developed and refined key frontend features including agent search, agent inventory management, chatbot interfaces, settings panels, and toggleable navigation menus while collaborating through Git-based version control workflows.
- Built reusable React components and styled interactive UI elements with CSS, improving maintainability and accelerating feature iteration during development.
- Diagnosed, debugged, and resolved frontend defects throughout the development lifecycle, enhancing application stability, usability, and overall user experience.

Relevant Technologies: React, CSS, Github

Equityblue, Inc. UT - *Development Contractor* 08/2021 - 04/2022

- Developed and deployed multiple automated Discord bots that surfaced real-time financial data to 50+ users across 3 server channels through dynamic message embeds.
- Integrated the Discord API with external financial data APIs to fetch, process, and present structured data each morning, ensuring users had timely access to key financial information.
- Implemented a command-based interaction system that delivered customized financial insights in under a second, handling dozens of user queries each day.

Relevant Technologies: Node.js, Discord API, Financial Modeling Prep API

Independent Contractor - *Construction* 06/2023 - Present

- Managed independent construction projects (demolition, reconstruction, and finish work) while pursuing software development opportunities and continuing technical education.

EDUCATION

Bachelor of Science in Computer Science 08/2019 - 05/2023

Westminster University
Salt Lake City, UT
GPA: 3.9/4.0

Relevant Coursework: Web Applications, Software Engineering, Algorithms, Machine Learning, Cybersecurity, Computer Networks

Google Cyber Security Certificate 09/2024 - 01/2025

Coursera

Completed an 8-course series covering security fundamentals — risk management, threat and vulnerability analysis, network security, and Python task automation.
